Summary

Information Systems fresh graduate driven by a hands-on approach to building reliable, scalable systems through automation and Infrastructure-as-Code. Strong problem solver with expertise spanning full-stack web development, DevOps automation, and cloud infrastructure. Experienced in modern tech stacks (Laravel, FastAPI, Next.js) and infrastructure tools (Docker, Kubernetes, Ansible, ArgoCD).

Work Experience

Web Developer Intern, Telkom Indonesia – Bandung

July 2025 – Aug 2025

- Developed full-stack features for an internal web application using Laravel and MySQL, including data persistence and automated email notification workflows, with Docker in an Agile/Scrum team environment

Organizational Experience

Practicum Assistant, EAD Laboratory

Jan 2024 – June 2026

- Mentored lab groups of 5-7 students in Object-Oriented Programming (OOP) with Java and web development using the Laravel framework, alongside software project management fundamentals
- Designed practical case studies and assessments covering core OOP principles and web development fundamentals
- Authored instructional materials and documentation for Laravel-based practicum modules

Practicum Assistant, Sisjar Laboratory

Feb 2025 – June 2025

- Mentored lab groups of 6-8 students in Linux fundamentals and server virtualization concepts
- Designed hands-on case studies for Linux administration and virtualization scenarios

Education

Telkom University, Bachelor of Computer Science (S.Kom) in Information Systems

Jan 2022 – Jan 2026

GPA: 3.77 (*Cum Laude*)

Related Coursework: Object-Oriented Programming, Web Application Development, Project Management, Data Warehouse and Business Intelligence, Data Mining, Network Service Management, Cloud Infrastructure

Paper: Virtual Machine-based Capture the Flag Challenge Provisioning Automation Using Infrastructure-as-Code — 2026 4th International Conference on Information Technology and Computing (ICITCOM). Designed a FastAPI middleware bridging CTfD, Proxmox VE, and Ansible to automate the full CTF challenge VM lifecycle, from cloud-init provisioning to teardown, validated through comparative benchmarking against manual deployment.

Skills

Backend: PHP (Laravel), Python (FastAPI), Node.js/Express, TypeScript, RESTful API design, MVC Architecture, MySQL, MongoDB, JWT Authentication

Frontend: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Vite

DevOps Tools & Automation: Docker, Kubernetes, Jenkins, Argo CD, Ansible, Proxmox VE, CI/CD, Git
