WORK EXPERIENCE

EAD LABORATORY

Practicum Assistant

2024-June 2026

- Guided practical lab groups of 5-7 students in learning Object-Oriented Programming (OOP) concepts with Java, web development using Laravel framework and project management
- Designed and developed practical case studies focusing on fundamental OOP principles and basic web development scenarios to build strong programming foundations in students
- Created comprehensive learning materials for practicum modules covering fundamental concepts in Laravel framework

TELKOM INDONESIA

Web Developer Intern

Jul 2025-Aug 2025

- Developed a web application using Laravel framework with MySQL database to support internal process
- Collaborated closely with a team of developers, participated in agile development cycles
- Incorporated user feedback to improve application usability and functionality

SISJAR LABORATORY

Practicum Assistant

FEB2025-June 2025

- Guided practical lab groups of 6-8 students in mastering fundamentals of virtualization and linux basics
- Designed and developed practical case studies focusing on linux and virtualization basics

EDUCATION

MA AL-Irsyad Tenganan

High School, Islamic Studies

2018-2021

Telkom University

Bachelor of Science in Information Systems - 3.77 GPA

2022-2026

PROJECT

ctf-proxmoxer

- Built a FastAPI backend service that automates CTF challenge VM provisioning on Proxmox VE, bridging CTFd via a custom plugin and Ansible over SSH
- Designed an image pipeline where challenge repos are auto-built into Docker images, pushed to a self-hosted registry, and mirrored for offline-safe deployment
- Automated the full challenge lifecycle (prepare → deploy → terminate) including VM cloning, cloud-init provisioning, iptables port forwarding, and cleanup

SKILLS

- Infrastructure & Platform: Kubernetes, Jenkins, Proxmox, Docker, Cloud, Terraform, Argo CD
- Web Development: Laravel, FastAPI, Next.js
